General remarks

This report shall not be reproduced except in full without the written approval of the testing laboratory.

The test results presented in this report relate only to the item tested.

Clause numbers between brackets refer to clauses in EN 60598-1.

"(see remark #)" refers to a remark appended to the report.

"(see Annex #)" refers to an annex appended to the report.

Throughout this report a comma is used as the decimal separator.

General product information

- 1, All models are similar except their model name, power, size and LED driver. All tests were conducted on model B01XX-40-ZZZ.
- 2, The max. ambient temperature is 25 $^{\circ}$ C.
- 3, The test report include: Attachment No. 1: Report of EN 62031.

Attachment No. 2: Report of EN 62471.(It not within the scope of CNAS).

^{*} Small source defined as one with α < 0,011 radian. Averaging field of view at 10000 s is 0,1 radian.

Note: The action functions: see Table 4.1 and Table 4.2

The applicable aperture diameters: see 4.2.1

The limitations for the angular subtenses: see 4.2.2

The related measurement condition 5.2.3 and the range of acceptance angles: see Table 5.5
